Need to Know: Canada/ Univ. of British Columbia

Objective of the “Need to Know” Document
The Need to Know document is an advising tool written by a Berkeley Study Abroad adviser to review program specific details that may impact a student’s decision to apply for an EAP program. The document is not a summary of eligibility requirements, academic, housing, application and other logistical details freely available to students on the UCEAP and BSA website, and reviewed by a student in the Program Self-Assessment. The best source of detailed program information is always the Student Guide from the prior academic cycle. If any concerns you have are not addressed on the UCEAP website, in the Student Guide or Need to Know document, please contact the BSA adviser for this program.

Adviser Contact Information
For BSA Adviser name, phone, email and drop-in advising hours, visit https://studyabroad-prod.berkeley.edu/aboutUs/contact/index.php

Students studying at University of British Columbia must apply for the Year. The Bamfield Marine Research Program is a fall semester program.

The best way to find out if the EAP-Canada is a good match for you is to talk to returned students. Email the Canada adviser and ask for email addresses of students to write to who have done the program in the recent past.

Year Program Ending Date: The year program ends in April. Grades are usually submitted in a very timely fashion and are available by the end of spring semester at Berkeley. Seniors can go on the Year program and return to Berkeley for graduation ceremonies at the end of UCB’s spring semester.

Field of study: The University of British Columbia, as the second-largest university in Canada with an enrollment of over 32,000, has over 100 departments and offers courses in a wide-range of subject areas. However some areas of study in both undergraduate and graduate fields are off-limits because of limited enrollment for Canadian students and some have only limited course availability. Check the Academic Section of the Student Guide for particulars.

Bamfield Marine Research Station: Anyone contemplating doing the Bamfield fall semester in marine biology program should know that it is a rigorous program for serious students who have graduate school in marine biology in mind. The Bamfield Marine Research Station is located on the remote west coast of Vancouver Island. It is not possible to do a partial program. The Bamfield option requires a commitment to a full semester load of 5 courses. You will be enrolled at the Univ. of British Columbia while on the program but will not have any contact with the actual UBC campus for orientation or instruction: everything happens at Bamfield on Vancouver Island, and you live at Bamfield the entire semester. For more in-depth information ask the Canada adviser if you can read the Canada trip report from November 2002.

The Killam Fellowship for Undergraduates funds a Canada Fulbright exchange for U.S. students who want to study abroad for a year or a semester in Canada: http://www.killamfellowships.com

The Killam Fellowships Program provides an opportunity for exceptional undergraduate students from universities in the United States to spend either one semester or a full academic year as an exchange student in Canada. The program provides a cash award of $10,000 ($5,000 per semester) as well as an allowance of $500 to offset health insurance costs. In addition, all Fellows are eligible to apply for a mobility (travel) grant in an amount not to exceed $800.

You must be a U.S. Citizen with a U.S. passport, have junior standing by departure for your study abroad program, have a good GPA and possess certain ambassadorial qualities. Students need to identify 4 Canadian universities they wish to apply for and rank-order them. Your first choice should be University of British Columbia on EAP. Deliver one copy of the Killam Scholarship to the Berkeley Study Abroad Office. On your EAP program you will be expected to engage in research or an internship and community service. Students must participate in an Orientation in fall and a Field Trip to Washington in spring. Semester only students must attend both the fall Orientation and the spring trip to Washington.
